

Self-sticking tender tape

SPITA **ResQ-plast**[®]

PROFESSIONAL

- Doesn't stick to skin or hair
- Permanently breathable
- Self-sticking
- Prevents allergy to plaster

- Permanently stretchable
- Latex free
- Resists oil, grease and dirt
- Works even under water

CAN BE REMOVED PAINLESSLY

FAST AND EASY TO USE:

To make a dressing, fold the plaster several times onto itself to get the desired thickness. The dressing must be large enough to cover the bleeding wound.

Place the dressing onto the wound and stretch **SPITA ResQ-plast** a little and wrap it securely. Wrap 4-5 layers from left to right (or right to left) and tear the tape. Press the loose end of the tape firmly onto itself to secure it.

Self-sticking tender tape **SPITA ResQ-plast**

The versatile and skin friendly self-sticking plaster!

Because **SPITA ResQ-plast** only sticks to itself, it is easy to use on a wet and/or dirty skin. In case of severe bleeding injuries you may apply **SPITA ResQ-plast** direct onto the wound to stop the bleeding. When you stretch **SPITA ResQ-plast** a little, while you wrap it around, it will stick immediately onto itself. The plaster remains flexible at all times and it will not hinder the moves of your joints.

SPITA ResQ-plast can be applied under water (!) and will not come off during swimming or when you take a shower. **SPITA ResQ-plast** is therefore extremely useful with jobs where (a lot of) water or fluids are used (dish water, cooking, washing, etc.) and where your hands often will become wet (chefs, butchers, plumbers, firemen, etc.)

SPITA ResQ-plast is excellent for:

- ✓ Injuries to fingers, toes, etc.
- ✓ Cuts, abrasions, lacerations
- ✓ Blisters
- ✓ Covering applied ointment
- ✓ Compression bandage
- ✓ Joint injuries
- ✓ Torn nails
- ✓ Alternative to sports tape
- ✓ Wet, dirty or greasy skin
- ✓ Animals / Pets (doesn't stick to the fur)

User instructions to wrap on finger tip:

Apply **SPITA ResQ-plast** over the tip of the finger.

Wrap **SPITA ResQ-plast** from back to front.

After 4-5 wraps tear **SPITA ResQ-plast** and press end of tape firmly onto itself.

This is also an excellent method to protect your finger(s) against sharp objects.

ATTENTION: We recommend the use of an appropriate disinfectant on a bleeding wound first!!

WARNING: When **SPITA ResQ-plast** is wrapped too tight, it can hinder the blood circulation. If this occurs please unwrap the material and wrap it less tight.

TIP: **SPITA ResQ-plast** has a very long shelf-life. Keep **SPITA ResQ-plast** in the blister pack to prevent it from becoming dirty.

Dimensions:

"standard" : 25 mm (w) x 4,5 mtr (l)

"XL-variant" : 25 mm (b) x 10 mtr (l)

"wide" : 50 mm (w) x 4,5 mtr (l)
